Bio43	Corentec Co., Ltd.		BENCOX HIP SYSTEM	The artificial hip joints developed by Corentec can move freely and adopt any posture because their range of movement is very much the same as that of a normal person's hip joint. The surface of the artificial joints is structurally similar to human bone, so it adheres tightly to the surrounding bones, or the surrounding bones can grow into the surface of the artificial joints rapidly after surgery. In addition, the design of the artificial joints is similar to the shape or structure of the femur, so the joints can integrate with the human body. The joints do not wear out with normal use, so they can be used almost
Bio43	Corentec Co., Ltd.		LOSPA KNEE SYSTEM	in the field of knee replacement, Corentec has improved the safety of the joint's surface during flexion by eliminating the shortcomings of existing products. The new products can deliver the natural joint movement of a real knee because they have an anterior flange form and suitably sized normal patella tracking. In addition, a posterior condyla design has been applied to enable deep flexion of more than 140 degrees.
Bio43	Corentec Co., Ltd.		Coralis® Shoulder System	The anatomic Total Shoulder Arthroplasty (TSA) achieves to restore or replicate the anatomy of the glenohumeral joint and the rotator cuff. Reverse Shoulder Arthroplasty (RSA) is designed specifically for the treatment of glenohumeral (GH) arthritis when it is associated with irreparable rotator cuff damage, complex fractures as well as for a revision of a previously failed conventional Total Shoulder Arthroplasty (TSA) in which the rotator cuff

Bio53	DAESUNG MAREF CO	www.dsmaref.com	Sequential Intermittent Pneumatic Compression System	<p>The application of Sequential Intermittent Pneumatic Compression (SIPC) to venous and lymphatic dysfunction is effective for physiotherapy. Our SIPC is designed and specialized as a sequential and gradient compression system for the optimized lymphatic drainage. Gradient, sequential compression is for effective lymphatic drainage therapy, management and wound care (accelerates healing). it stimulates lymphatic drainage, circulation and also moves lymph fluid to the correct physiological direction. Main lymphatic therapies are using with MLD (Hand Therapy), Bandage (compression bandage), and Compression stocking (compression stocking) separately and together. As IPC system is more active therapy than stocking or manual, it automatically pushes the patient's swelling area with the pneumatic pump which set the appropriate pressure and the</p>

Bio53	DAESUNG MAREF CO	www.dsmaeref.com	IPC (Intermittent Pneumatic Compression) therapy system	ARM/CHEST (AC)sleeve effectively proceeds lymphedema treatment by discharging stagnant lymph fluid in the correct physiological direction of lymph drainage and circulation of the human body due to lymph damage caused by breast cancer surgery and orthopedic surgery in the upper body. Designed by DS MAREF, this new type of "ARM/CHEST (AC)sleeve" lymphedema cuff has developed a suitable internal chamber structure. In particular, it is designed to move stagnant lymph fluid from the arm to the breast and to the lymph nodes in the groin as well as the normal armpit on the other side of breast cancer patients.
Bio53	DAESUNG MAREF CO	www.dsmaeref.com	Continuous Thermo Compression System	CTC-7 wraps simultaneously deliver heat or cold water and active air-compression to help prevent and treat your body injuries. Active air compression helps to reduce the swelling heating further reduces swelling, muscle spasm and pain.  ▶Main features  Cold + Heat + Contrast therapy  It can be drained automatically, so much easier to use  Easy maintenance with digital temperature control  It has no ice or hot substances, only needs water  Definite care for selectable body parts wraps

Bio74	GCS Co.,LTD	www.gcsbio.com	OXIVI AUTOMATED AMBU BAD VENTILATOR	This is an BVM(Bag valve mask) automatic assist device which is normally used in emergency cases. Oxivi is easy to operate and has a function that controls the amount of breath and number of breaths, so it can be applied to all people, including children and elderly. There are strengths for OXIVI AUTOMATED AMBU BAG VENTILATOR - Easy to use and install - Constant force is applied and an constant airflow is possible - Control the amount of breath and time - Smart ventilator for elderly, adult, adolescent, pediatric and neonatal patient - No need of an assistant & Safe from infection
Bio74	GCS Co.,LTD	www.gcsbio.com	Non-Contact IR Temp Thermometer (TH-21)	Accuracy of IR Thermometer Infrared thermometer takes advantage of infrared's ability to transport energy through space. Because the infrared thermometer's sensor senses heat, it can measure body temperature over a distance without direct contact. The non-contact IR thermometer measures the infrared radiation emitted from the human body and shows it in terms of temperature. Body temperature is measured by the amount of infrared radiation emitted through temporal artery distributed in the forehead. The most sensitive area for changes in body temperature is the forehead, so it is mainly measured in the forehead area. There are 3 strengths such as Non-Contact Measurement, Living Temperatures Measurement, Convenience. Also, Non-Contact IR Temp Thermometer has KCC & CE DOC
Bio74	GCS Co.,LTD	www.gcsbio.com	V-Shield set	*Product ranges: Sterilization Spray & Sterilization Patch & Sterilization Multipurpose Clip V Shield is a safe ingredient in life. Suggest a new, healthy, clean antibacterial lifestyle by eliminating the causal molecules of exposed harmful ingredients. V-shield uses Chlorine dioxide which and effective substance recognized by the World Health Organization as the highest safety grade (A-1). World-recognized safe substance! Also, High technology for area sterilization using chlorine dioxide gas is applied to all the products of V-shield. The good thing is that Clients select products and compose

Bio75	GenBody Inc.	www.genbody.co.kr	GenBody COVID-19 Ag	<p>GenBody COVID-19 Ag is an immunoassay kit for rapid and qualitative determination of SARS-CoV-2 infection from swab specimens. Antigens of SARS-CoV-2 in the specimens are allowed to react with the anti-SARS-CoV-2 monoclonal antibody-coupled gold conjugate followed by reaction with anti-SARS-CoV-2 monoclonal antibodies immobilized in the test line. When the sample contains SARS-CoV-2 antigens, a visible line appears in the test region on the membrane. The solution continues to migrate to encounter a control reagent that binds a control conjugate, thereby producing another band in the control region.</p> <p>GenBody COVID-19 Ag is also very useful to directly detect SARS-CoV-2 antigens from human swab samples.</p> <p>Cat no. : COVAG025 Specification: - 2 Line - Single device</p>
Bio75	GenBody Inc.	www.genbody.co.kr	GenBody COVID-19 IgM/IgG	<p>GenBody COVID-19 IgM/IgG device is a chromatographic immunoassay kit for the rapid and differential detection of immunoglobulin M (IgM) and immunoglobulin G (IgG) against COVID-19 using serum, plasma and whole blood.</p> <p>Cat no. : COVI040 Specification : - 2 Line + 2 Line - Double device 20 Tests/Kit</p>
Bio75	GenBody Inc.	www.genbody.co.kr	GenBody Influenza/COVID-19 Ag Multi	<p>GenBody Influenza/COVID-19 Ag Multi is combined of COVID-19 antigen test and influenza A and B antigen test, which use the immunoassay method. In the case of COVID-19 antigen test, the kit detects the nucleoprotein (NP) of SARS-CoV-2 in the swab specimen. Monoclonal antibody (mAb) specific for NP of SARS-CoV-2 is immobilized on the test line region and another mAb is conjugated with gold nanoparticle and placed in the pad. When the sample contains the SARS-CoV-2 antigens, the antigens are allowed to react with anti-SARS-CoV-2 mAb-coupled gold conjugate followed by the reaction with another mAb in the test line (T), which make a visible line in the membrane. The solution continues to migrate to encounter a control reagent that binds a control conjugate, thereby producing another band in the control region (C).</p> <p>In the case of influenza antigen test of the kit, mAbs specific for NP of influenza A and B are coated on the A and B region in the membrane, respectively. And, another anti-influenza A and anti-influenza B mAbs are conjugated with colloidal gold, respectively, and placed in the pad. When the sample contains the influenza antigens, the antigens are allowed to react with anti-influenza A/B mAb-coupled gold conjugate followed by the reaction with another mAb in the test line (A/B), which make a visible line in the membrane. The solution continues to migrate to encounter a control reagent that binds a control conjugate, thereby producing another band in the control region (C).</p> <p>GenBody Influenza/COVID-19 Ag Multi is very useful to</p>

Bio87	Hankil Tech Medical	www.hankiltech.com	Surgical Instrument	<p>Established in 1969, our first product was a medical device used in surgery in hospitals. At that time, as a first-generation manufacturer of localized medical devices in a barren area of the medical device industry, we have consistently devoted ourselves to manufacturing medical devices as our name. Currently, due to the price competitiveness of low-cost products in China, Pakistan and India, we are focusing on the development and production of more precise and high-level products.</p> <p>Our representative special surgical instruments include Retractor, Endo Forceps, CCR, Ronger, Punch, etc., and all products are manufactured through strict quality control with 50 years of experience and technology.</p> <p>In addition, localization of Endoscope surgical instruments, which are frequently performed these days, has been localized and supplied to famous hospitals and university hospitals in Korea, and this technology has been recognized for export to Japan and Indonesia. In particular, it has been recognized for its technology by exporting surgical instruments that are used for open-air surgery on the breastbone, which require precise product manufacturing, after passing through Japan's demanding quality inspection and obtaining a marketing license.</p> <p>① All products are self-designed and manufactured - capable of special production upon customer request.  ② New products that are tailored to changes in the latest surgical techniques are released on a regular basis.</p>

Bio98	Huons Global Co., Lt	www.huonglobal.co	Hutox Injection 100 Units (Clostridium Botulinum Toxin Type A)	<p>Main ingredient: Clostridium Botulinum Toxin Type A.</p> <p>Dosage form: freezed dried white powder for reconstruction with sterile, 0.9% sodium chloride solution with preservative-free.</p> <p>Indication: temporary improvement in the appearance of moderate to severe glabellar lines associated with corrugator and/or procerus muscle activity in adult patients aged 19~65 years old.</p> <p>Dosage &amp; Administration (Glabellar Lines): Reconstitute this product with 0.9% preservative-free, sterile saline to make 100U/2,5mL (4U/0.1mL) and using a 30-gauge needle, inject a dose of 0.1mL into each of 5 sites, 2 in each corrugators muscle and 1 in procerus muscle, for a total of 20U.</p> <p>Strength: Clostridium Botulinum Toxin Type A 100 Units / 200 Units</p> <p>Mechanism of action: Botulinum toxin is produced by Clostridium botulinum bacteria. When a small amount of HUTOX is injected, it blocks the signals to the muscle, which are required for contraction of the muscle. So the effect is that it temporarily only weakens the facial muscles, it doesn't completely paralze it. This helps the face to relax and hence</p>

Bio132	Man & Tel Co., Ltd.	www.manntel.com	Automatic balance test and training equipment 「Balance Pro (SBT-330)」	<p>Balance Pro (SBT-330) is for vestibular rehabilitation patients and lower limb rehabilitation patients. It is a vestibular exercise machine capable of cognitive, balance, and strength training using four footplate weight sensors. Patient-specific training is possible, and dementia prevention and pleasant training are possible through various game contents. In addition, the difficulty level is adjustable, so it can be used by both severe and mild patients with one device.</p>
Bio132	Man & Tel Co., Ltd.	www.manntel.com	「Sliding Balance Trainer (MSBT-10)」	<p>The sliding balance trainer (MSBT-10) is for hemiplegic patients and the elderly. It is a manually operated function recovery device that rebuilds the lower body muscles and restores joints by sliding the patient's body up and down while safely lying on the bed and repeating the motion of bending and stretching the legs up and down. Difficulty level can be adjusted using gravity, and it is possible to train the right or left affected side. It is characterized that the patient actively exercises and can strengthen lower extremity muscle strength and train balance ability.</p>
Bio132	Man & Tel Co., Ltd.	www.manntel.com	3D Balance Trainer(3DBT-12)	<p>3D Balance Trainer (3DBT-12) is a rehabilitation treatment equipment that improves lower extremity muscle strength and balance ability through horizontal movement of the center of gravity and vertical movement for patients who need balance training. You can measure the left and right loads, evaluate the patient's vertical balance ability by using the degree of bending of the knee, and determine the improvement of the body with data accumulated for a long period of time. All training consists of games, so the patient is fun and active, so the effectiveness of the treatment can be increased. For severe patients, it is possible to use game for only horizontal movement of the center of gravity without bending the knee.</p>

Bio154	N-Finders Co., Ltd.	www.nfinders.com	PDO thread	N-Cog PDO thread  N-COG is the COG Thread of new technology which makes up for the weakness such as breaking through of skin unfixed and moving around or a break when the existing thread with processus, either one-way or two-way, is inserted in skin. It also has a strong benefit of evenly pulling overall part where procedure has been conducted, not a partial pull, by efficiently designing for skin pull considering directions and angle of COG.  01 To prevent a phenomenon of wrinkled skin by dispersing gravity force of the tissue which is caught in processus  02 Equal pull by dispersing stress  03 To maximize bond between thread and tissue by dispersing both force and stress  04 To form effective force merely with thin thread  05 Applicable to various parts: skin around eyes, wrinkles formed around mouth, marionette lines, etc.

Bio200	VALUE AND TRUST CO	<a href="https://vntc.me">https://vntc.me</a>	Spinamic (Scoliosis brace)	<p>Spinamic is an ergonomic and patient-friendly scoliosis brace for maximized compliance. It aims to improve patient's quality of life while treating them in the most innovative way.</p> <p>Standard scoliosis braces are rigid, made of conventional hard plastic. Many patients suffer from pain after wearing rigid braces for 18 hours a day, psychological stress from the stigma of the armor-like appearance, and side effects such as rib fractures, lowering of musculoskeletal growth and unsanitary conditions.</p> <p>To combat these shortcomings, Spinamic was made with neoprene, mesh and Velcro, making the vest much lighter and more comfortable. Spinamic composed of a fiber material that encourages wear time and enables patients to wear it easily. It is also equipped with a pressure regulator inside the calibrator that applies appropriate pressure according to the patient's spinal curvature, allowing for more accurate treatment.</p> <p>Using a three point lateral compression mechanism, Spinamic generates desirable mechanical force based on the principal of three points lateral compression to achieve the whole-body alignment and balance. Plus, compression-strength-adjustable</p>
